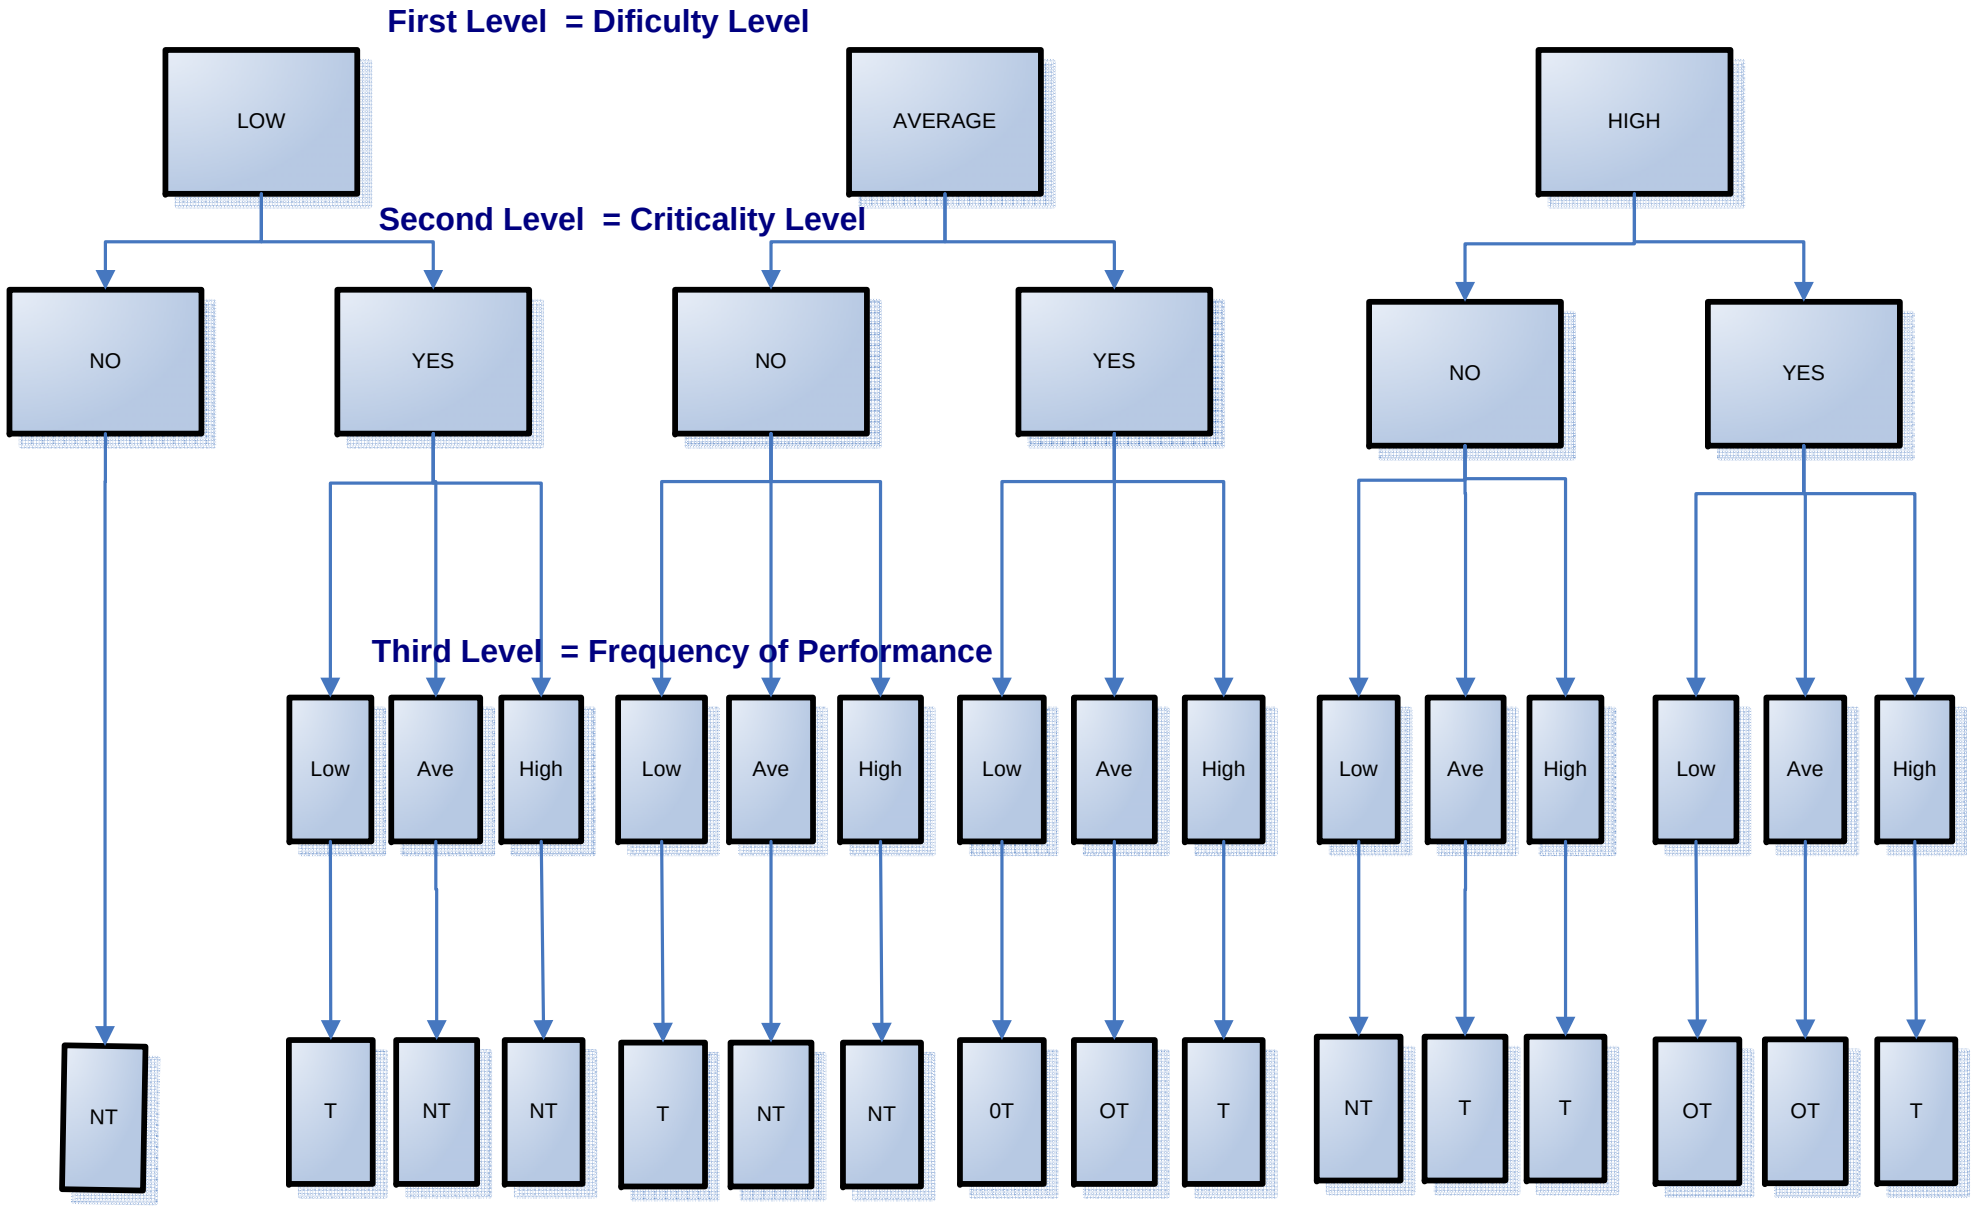
Difficulty, Criticality, Frequency (DCF) Model for Training Content Selection



T = Train **NT = No Train** **OT = Over Train***

This evaluation instrument adapted from MIL-HDBK-29612-2A, Instructional Systems Development/Systems Approach to Training (ISD/SAT), Page 71, dated 31 August 2001.

* The need to Over Train may also be a good indication that supplemental training aids, jobs aids, electronic performance support systems (EPSS), etc. may also be warranted.
